Core Ingredients of Pediatric Digestive-Aiding Patch

TCM Herbs for Targeted Digestion Regulation

Hordei Fructus Germinatus (Malt)

Breaks down staple foods (rice, noodles) and boosts appetite

Aucklandiae Radix (Costus Root)

Promotes intestinal peristalsis and reduces stomach pain

Raphani Semen (Radish Seed)

Relieves abdominal bloating and helps food move down the digestive tract

Amomi Fructus (Amomum Fruit)

Regulates intestinal flora, aids intestinal function recovery, and improves weak defecation.

Aurantii Fructus Immaturus (Immature Bitter Orange)

Speeds up gastric emptying and eases bloating and acid reflux

Chicken Gizzard Lining (Gallus Gallus Fructus)

Breaks down meat/fats, protects stomach lining

Targets 4 Demographic Groups, Effectively Promotes Digestion

Herbal Digestive Support, Mild Soothing & Regulation for Kids

Children with weak spleen-stomach

- Prone to indigestion, bloating, food stagnation, etc.
- Digestive patch: Strengthens spleen, eases digestion, relieves issues.

Children with diet/cold-induced digestive issues

E.g., indigestion, abdominal distension, and food stagnation due to overeating, indigestible food, or cold exposure.

Adults with indigestion & food stagnation

Including office workers with irregular diets, late-night snack habits, postprandial flatulence, and those with epigastric fullness, halitosis, or constipation from poor eating habits.

People with weak spleen-stomach, food stagnation, bloating & poor appetite

It covers children and adults who have long-term food stagnation, abdominal distension and loss of appetite due to poor spleen and stomach function.

Precautions

- Consult a doctor if pregnant or breastfeeding.
- Avoid use on irritated or broken skin.
- Not for medical use. Seek medical advice for chronic conditions like insomnia or depression.

4 Core Technologies for Digestive-Aid Patch

Empowering Tech: Digestion Enhancement & Discomfort Alleviation

Herbal Penetration Acupoint Stimulation Tech

- **Tech Core:** Natural herbs + TCM acupoint wisdom.
- **Action:** Active ingredients penetrate skin fast to target digestion acupoints.
- **Efficacy:** Boosts gut peristalsis, enhances food digestion/absorption, effective without pills.

Premium Natural Herbs

- **Selection:** Carefully chosen high-quality Chinese herbs.
- **Composition:** Free of harsh chemicals.
- **Efficacy & Safety:** Gentle on the body, suitable for long-term daily digestion enhancement.

Extraction Fermentation Tech

Adopts advanced extraction and fermentation processes to maximize the activity of herbal ingredients, ensuring faster absorption and more lasting effects for bowel regulation.

Breathable Skin-Friendly Adhesive

Uses medical-grade breathable adhesive material that sticks firmly without falling off. It's non-irritating to the skin and leaves no residue, making it comfortable for all-day wear.

Correct Usage of Digestive System Care Patch

For Daily Gastrointestinal Care

Application Sites

- **Bellybutton (Shenque Point):** Located at the center of the abdomen, right at the navel. It is a commonly used acupoint in traditional Chinese medicine for health preservation and gastrointestinal regulation.
- **Zhongwan Point (CV-12):** Located in the upper abdomen, on the anterior midline, 4 cun above the navel. It is a key acupoint for regulating the spleen and stomach and promoting digestion.

Application Frequency

Once a day.

Application Duration

- Baby (3 months old): 1 hour
- Baby (6 months old): 2 hours
- Toddler (1 year old): 2-4 hours
- Toddler (3 years old): 4-6 hours
- Child (4 years old and above): 4-8 hours
- Adult: 6-12 hours
